THE B.I.G. ANATOMICAL TRAINING LEG

WaisMed offers Medical/EMS/Nursing programs a unique new training aid simulating real life anatomical challenges.

Medical Professionals can now truly understand the proper landmarks and placement of Intraosseous Devices on the B.I.G. Anatomical Adult Training Leg.

This innovative Anatomical Adult Training Leg features:

- ★ *Portable training accessory.*
- ★ *Similar to most adults.*
- ★ *Palpable Tibial Tuberosity.*
- ★ *Replaceable disposables (Skin and Cartridge).*
- ★ *Immediate location verification feedback.*

This adult training aid was developed for use in conjunction with the B.I.G. (Bone Injection Gun - automatic intraosseous devices).
